

Matin Mohammadi

Front-End Developer · React / Next.js · Full-Stack Development

Sanandaj, Iran · [matinmohammadi.dev](#) · GitHub: [MatinMuhammadi1381](#)

Available for remote opportunities · International freelance experience

PROFESSIONAL PROFILE

Front-End Developer with hands-on React and Next.js experience since 2020, currently expanding toward full-stack and software engineering. Experienced in building responsive, production-oriented interfaces with React, TypeScript, Next.js and Tailwind CSS, while developing practical backend skills with Node.js, NestJS, PostgreSQL, Prisma and Supabase. Self-directed learning is supported by freelance work, an industry internship, personal products and end-to-end engineering projects.

PROFESSIONAL EXPERIENCE

Freelance Front-End Developer — Remote · International Clients

[2021 – Present](#)

- Delivered front-end work for international clients through Upwork and Fiverr.
- Worked across the full task lifecycle: requirements, implementation, responsive UI, debugging, revisions and delivery.
- Built interfaces and application features using React, Next.js, TypeScript and modern CSS/Tailwind workflows.

Front-End Developer Intern — Sanandaj Science and Technology Park

[2023 · 8 weeks](#)

- Worked in a 5-person development team supporting 4 local startups.
- Strengthened React fundamentals, responsive layout implementation and collaborative Git workflows.

Store Owner / Developer — Online Phone-Case Store · WooCommerce

[Ongoing](#)

- Own and maintain an online phone-case store, including storefront management and technical development.
- Work with WordPress and WooCommerce in a real business environment.

CORE TECHNICAL SKILLS

Frontend	React.js · Next.js · TypeScript · JavaScript ES6+ · HTML5 · CSS3 · Tailwind CSS
Backend	Node.js · NestJS · PostgreSQL · Prisma ORM · Supabase
Cloud / Media	Cloudinary · Supabase
Tools	Git · GitHub · VS Code · WordPress · WooCommerce
Engineering	Responsive UI · Component architecture · API integration · Database integration · Performance · Testing

EDUCATION

Bachelor's Degree in Computer Engineering · Islamic Azad University of Sanandaj · 2019 – 2023

LANGUAGES

Persian — Native | Kurdish — Native | English — Advanced (C1)

SELECTED PROJECTS

01 · Bus Tracking System

BasTrack · Full-Stack / Real-World System

- Production-oriented intercity bus tracking platform developed independently from architecture and documentation through implementation.
- Built a Persian, mobile-first system covering passenger tracking, driver workflows, GPS enforcement, support operations and trip management.
- Designed for self-hosted deployment with scalable foundations, secure per-trip passenger links and live/approximate movement handling during temporary connectivity loss.
- Tested in real-world intercity trips; the current application logic and UI are operational.

02 · Used-Phone Marketplace

ShopMobile · Full-Stack Personal Project

- Built with Next.js App Router, TypeScript, PostgreSQL via Supabase, Prisma ORM and Cloudinary.
- Implemented real database integration, media uploads and server-side data patterns.
- Independently resolved practical integration challenges involving Prisma versions, Supabase connection pooling and Next.js Server Component data flows.

03 · Online Phone-Case Store

WooCommerce · Ongoing Product

- Owner/developer of an online phone-case store using WordPress and WooCommerce.
- Provides hands-on experience with a live commerce workflow, storefront management and technical maintenance.

GITHUB PRACTICE & LEARNING PROJECTS

Nike_project	React + Vite + Tailwind CSS
Bank_project	React
Landing_page	TypeScript
To-Do-List	React
Factor_Form	React
Matin_portfolio	Personal portfolio
Bus Tracking System · BasTrack	Production-oriented full-stack project — GitHub repository coming soon

Note: the GitHub entries above are self-directed learning and practice repositories unless explicitly described as a product or client project.

PROJECT ENGINEERING PATTERNS

- Component-based UI architecture with reusable React patterns.
- Type-safe application development with TypeScript.
- Database-backed application design with PostgreSQL and Prisma.
- API and server-side integration using Next.js and Node.js ecosystem tools.
- Responsive, mobile-first interfaces with attention to usability and performance.
- Practical debugging and independent resolution of integration and deployment issues.

TECHNICAL PROFILE & CAREER DIRECTION

My strongest foundation is in frontend engineering, especially React and Next.js. My current development path is intentionally moving beyond UI implementation toward full-stack application engineering, backend architecture, testing, performance and production reliability.

CURRENT LEARNING & DEVELOPMENT

- Deepening TypeScript knowledge and application architecture.
- Developing stronger backend engineering skills with Node.js, NestJS and PostgreSQL.
- Improving database design and ORM practices with Prisma and Supabase.
- Expanding automated testing knowledge with Jest, React Testing Library and Playwright.
- Studying application performance, maintainability and scalable engineering patterns.

ENGINEERING APPROACH

- Prefer practical implementation and real-world testing over purely theoretical solutions.
- Break complex features into explicit, testable engineering steps.
- Use Git and structured project workflows to keep development traceable and maintainable.
- Use AI coding agents as engineering assistants while retaining responsibility for architecture, verification and final implementation.
- Prioritize clean interfaces, predictable behavior, responsive design and maintainable code.

CAREER DIRECTION

Seeking opportunities where strong frontend skills can contribute immediately while providing room to grow into broader full-stack and software engineering responsibilities. Particularly interested in React/Next.js products, modern web applications, scalable application architecture and technically challenging real-world projects.

PROFESSIONAL SNAPSHOT

Primary Focus	Frontend Engineering · React · Next.js
Current Direction	Full-Stack Development · Software Engineering
Core Strengths	UI engineering · React architecture · TypeScript · Next.js
Backend Growth	Node.js · NestJS · PostgreSQL · Prisma · Supabase
Work Experience	Freelance international clients · Industry internship · Product ownership
Project Style	Independent end-to-end development · Real-world testing · AI-assisted engineering
